

COMPANY PROFILE / SULTANATE OF OMAN

Grounded in capability.

CIVIL CONTRACTING / EARTHWORKS / INFRASTRUCTURE

Preparing the ground. Supporting what comes next.

01 / COMPANY OVERVIEW

Solid groundwork. Stronger possibilities.

Al Qaim International provides civil contracting, earthworks, roadworks and construction support in the Sultanate of Oman. From excavation and engineered fill to equipment mobilisation and material transport, our work prepares sites for the next stage of construction.

With a head office in Ruwi and a site office in Duqm, we support projects across Oman. Our approach brings together site planning, experienced personnel, heavy equipment and coordination with contractors and consultants to deliver work to project requirements.

OUR PRESENCE

Head office: Ruwi, Muscat
Site office: Duqm
Sultanate of Oman

Project experience includes Sohar, Sur, Muscat, Barka, Rustaq, Ibri, Sinaw and Duqm.

02 / SCOPE OF SERVICES

The capability behind the work.

Connected services for the practical demands of civil, industrial and infrastructure construction.

01 / PREPARE THE GROUND.

Earthworks & excavation

Excavation, cutting, grading, levelling and site preparation for civil, industrial and infrastructure developments. Demolition and disposal activities form part of the wider service scope.

02 / BUILD A STABLE BASE.

Backfilling & materials

Supply and transport of backfill materials, followed by placement, watering and compaction in accordance with project specifications.

03 / CONNECT EVERY STAGE.

Roads & infrastructure

Road preparation, material crushing, sub-base and aggregate base course works for access roads and supporting infrastructure.

04 / DELIVER ESSENTIAL WORKS.

Civil contracting

Civil works and site infrastructure, including foundation excavation and concrete corridor construction within defined contract scopes.

05 / KEEP WORK MOVING.

Equipment & logistics

Heavy equipment rental, equipment mobilisation, material transport and site support for construction teams and main contractors.

06 / WORK TO THE RIGHT LEVEL.

Surveying support

Surveying support for setting out, levels and coordination of earthworks and civil engineering activities.

03 / PROJECT PORTFOLIO

Experience across Oman.

A portfolio spanning industrial, residential, commercial, government and power infrastructure.

PROJECT / CLIENT	LOCATION	STATUS

04 / PROJECT FOCUS / ONGOING

Grand Blue City Project

AL-SAWADI / INFRASTRUCTURE

Client Serka Taahut Insaat International

FIELD OPERATIONS / IMAGE FROM THE COMPANY PORTFOLIO

SCOPE OF WORK

Supply of backfilling material and transportation services to support site preparation and construction activities at Al-Sawadi.

Material supply and transport support the placement of fill needed for a stable construction platform. Coordination of deliveries helps maintain continuity between material availability and site requirements.

KEY ACTIVITIES

- / Backfilling material supply
- / Material transportation
- / Site preparation support

04 / PROJECT FOCUS / ONGOING

Green Ammonia Project at Duqm

DUQM / INDUSTRIAL

Client Cleantech Solutions LLC

FIELD OPERATIONS / IMAGE FROM THE COMPANY PORTFOLIO

SCOPE OF WORK

Road preparation, material crushing and filling to support logistics and construction access for the Green Ammonia Project.

The scope focuses on the road infrastructure needed to move construction resources and equipment. Crushing and filling activities prepare the ground for the project's access and logistics requirements.

KEY ACTIVITIES

- / Road preparation
- / Material crushing
- / Filling works

04 / PROJECT FOCUS / COMPLETED

Green Steel Plant at Duqm

DUQM / INDUSTRIAL

Client Vulcan Green Steel (Jindal Shaded Group)

1.5 million m³

CUTTING & BACKFILLING / COMPLETED OVER ONE YEAR

SCOPE OF WORK

Main contractor for earthworks, including excavation, backfilling, grading, levelling and compaction. The recorded scope includes 1.5 million cubic metres of cutting and backfilling completed over one year.

The works also included the supply and transport of imported backfill to the project location, together with raw-material transportation from Muscat to Duqm. Site preparation was executed to the client's specifications.

KEY ACTIVITIES

- / 1.5 million m³ cutting and backfilling
- / Imported backfill supply and transport
- / Grading, levelling and compaction
- / Muscat-Duqm material logistics

EARTHWORKS / MATERIAL SUPPLY / LOGISTICS

An integrated scope supporting the development of industrial infrastructure at Duqm.

05 / COMPLETED PROJECTS

Civil & residential infrastructure

04 / MUDHAIBI / CIVIL

Proposed ROP Complex at Mudhaibi

Client Durat-Al-Sahil Services and Trading LLC

Backfilling and compaction, supply and placement of approved sub-base materials, and laying and compaction of aggregate base course to the required design thickness.

Coordination with the main contractor and consultants supported inspections and approvals; the recorded scope was completed within the stipulated timeframe and allocated budget.

06 / AL BATINAH / INFRASTRUCTURE

Al Batinah Coastal Housing Project

Client AL-Rajhi Development Co. LLC

Earthworks and roadworks, including excavation, grading, land levelling and construction of internal road networks for the housing development.

The scope prepared the residential site and its access network for subsequent construction phases.

07 / NIZWA / CIVIL

Proposed STF Complex at Nizwa, ROP

Client Dolphin Trading & Investment LLC

Excavation and supply of imported backfilling materials, including laying, watering, grading and compaction for the STF Complex.

Imported fill was laid, watered, graded and compacted to the specified project requirements.

05 / COMPLETED PROJECTS

Commercial & industrial works

05 / FLAG SOHAR / COMMERCIAL

LULU Hypermarket at Flag Sohar

Client Al-Rawahi International Co. LLC

Earthwork excavation, backfilling and disposal of excavated materials for the hypermarket development.

Site preparation supported subsequent retail construction, with excavated-material disposal included.

08 / SOHAR / INDUSTRIAL

Sohar Refinery

Client Nafal Contractor & Trading Co. LLC

Excavation, backfilling and disposal of excavated materials within the refinery project.

Works followed the industrial project's engineering, safety and environmental requirements.

10 / DUQM / INDUSTRIAL

Duqm Refinery Service Corridor Project

Client Qurum Business Group (QBG)

Construction of concrete corridors, including excavation, concrete placement and pouring, and disposal of excavated materials.

Excavation and concrete corridor construction supported the refinery's service infrastructure.

05 / COMPLETED PROJECTS

Utilities & construction support

09 / DUQM / INFRASTRUCTURE

Construction of Channels Jurf & Saay in Duqm

Client Serka-Raeco JV Company

Subcontract equipment hiring and support, including heavy machinery, specialised construction equipment, skilled labour and equipment mobilisation.

Machinery and personnel were mobilised to support channel construction and continuity of site operations.

11 / OMAN / POWER

AL JAWABI Grid Station (OETC)

Client POWERTECH ZAWAWI (OETC)

Subcontract excavation and backfilling for tower foundations, including soil stabilisation and preparation of tower bases to the required depths and specifications.

Tower bases were prepared to specified depths and engineering requirements.

12 / DUQM / POWER

Tower Line Project in Duqm

Client KEC International Limited

Rental supply of heavy machinery and specialised equipment for construction and installation of the tower line infrastructure.

Rental equipment supported construction and installation of the tower line infrastructure.

06 / PLANT & EQUIPMENT

Ready for the heavy work.

Equipment supporting excavation, grading, compaction, loading and material transport.

NO.	EQUIPMENT	MAKE / ORIGIN	MODEL / CAPACITY	YEAR
1	Excavator	Hitachi	ZX350	2024

10	Water Tanker	MAN	5000 Gallon	2009
11	Tipper Truck	MAN	18 m ³	2013
12	Tipper Truck	MAN	18 m ³	2013
13	Tipper Truck	HINO	18 m ³	2015

Equipment descriptions, model/capacity values and years follow the supplied register. Equipment availability is confirmed against each enquiry.

EXCAVATION / COMPACTION / LOADING / TRANSPORT

07 / HEALTH, SAFETY & ENVIRONMENT

Care in every part of the process.

We are committed to the health, safety and wellbeing of employees, subcontractors, clients and the public, and to protecting the environment across our operations.

Our aim is to prevent incidents and injuries and continuously improve HSE performance. Safe working, employee health and environmental responsibility form part of operational planning and site execution.

01 Planning & objectives

Establish objectives, targets and action plans for health, safety and environmental performance.

02 Inspections & oversight

Conduct routine site inspections and systematic reviews to identify hazards and support corrective action.

03 Competence & training

Develop the knowledge and practical skills required for safe working, supervision and responsible site operations.

04 Compliance & responsibility

Work in accordance with applicable Omani requirements and relevant industry practices for health, safety and environmental protection.

08 / ORGANISATION

People behind the delivery.

GENERAL MANAGER

OPERATIONS MANAGER

Delivery departments and support functions

Quality control

QC engineer, QC technician and QC helper.

Civil engineering

Civil engineer, draughtsperson, site foreman, material receiver, roller, grader, JCB, excavator and shovel operators, tipper drivers and site labour.

Surveying

Chief surveyor, surveyor, surveyor helper and skilled labour.

Workshop

Supervisor, store in-charge, purchaser, mechanics, auto electrician, welder and tyre technician.

Finance

Chief accountant.

HR & administration

Supervisor and document controller.

Administration & secretarial

Administrative and secretarial support.

Office support

Office support personnel.

09 / CONTACT

Your next project. A solid starting point.
